What aspect of the UI Bar did you like the most? *

The details and figures used for the UI bar are unique & aesthetic.

What aspect of the UI Bar did you not like? *

The UI bar can be more exposed and well lit. It should be made either fully realistic or fully animated.

Island

Game Objects (Houses, Nature, others)	☐	☐	☐	☒	☐
Detailing	☐	☐	☒	☐	☐

What aspect of the Island did you like the most? *

The island looks interesting and interactive. The cliffs, forests and the beach were a nice touch to the UI.

What aspect of the Island did you not like? *

The sky looks very plain, it should be more graphic. The lighting and texture can be improved.

What else would you like to see in the game?

The details on the island can be more detailed to make it look realistic. Like the use of fountains, statues, street lamps etc.

What aspect of the UI Bar did you like the most? *

The wire-framing and the placement of the bar is very user friendly and the design is pretty good too

What aspect of the UI Bar did you not like? *

There is some extra negative spaces in between the objects which was a little distracting

Island

What aspect of the Island did you like the most? *

I really like the the overall appearance of the island , it was very clever to design a small island over the main because it adds more layer to it . The island if full of tress and i found it was a good planned thinking to use two different types of trees ! The cartoon feel is very balanced .

What aspect of the Island did you not like? *

When the objects are zoomed their colours fades and they don't come out as satisfactory , the look dull .

What else would you like to see in the game?

Adding more details to the environment would really hit the home run and adding small details in the houses would just be another cherry on top , for example adding more rocks and flowers around would take the visuals up by a notch
